

Dear Parent,

Research shows that most children lose 2-3 months of math learning over the summer. To combat this learning loss, our district will be using TenMarks to provide your child with access to a powerful, personalized summer math program designed to help him or her reverse summer learning loss. Your child has already been using TenMarks at school this year, and an hour a week over the summer is all it takes for your child to strengthen his/her math skills and prepare for the year ahead.

Here is how it works:

1. At the start of the program, your child will receive a short diagnostic assessment based on the grade s/he is completing.
2. The assessment will be automatically graded, and TenMarks will create a personalized program designed to prepare your child for the upcoming year.
3. Have your student work on his or her personal assignments and Jam Sessions for at least an hour a week over the summer.

The TenMarks Summer Math Program will guide your child through their personalized program, one assignment topic at a time, helping them refresh what they know, and learn what they don't. Each assignment contains embedded instruction (hints, video lessons, and interventions) to ensure success.

Check out the tips on the next page and watch the online webinar [TenMarks Summer Math Program: Keys to Supporting Growth at Home](#) to identify ways you can support your student this summer.

Let's say goodbye to summer learning loss!

Sincerely,

Am' Hall

Prizes will be awarded for participation
